PROJECTS

WikiFoodia https://github.com/Suha19/wikifoodia | https://whispering-earth-68482.herokuapp.com/
- A full stack application allowing users search for, create and share meals.
- Technologies Used: - HTML, CSS, JavaScript, MySQL, Node JS, Sequelize, Passport - APIs, ORM, Heroku, Express, Bootstrap, Google Fonts, Rubber Duckie.

TeleTale https://github.com/Suha19/TeleTale | https://teletale.herokuapp.com
- TeleTale is a Full Stack Application based on The Telephone Game. With TeleTale you can write and share stories with people from all over the world. Players can read, add, and vote on stories that they like. This is an easy to use application, all you have to do is create your own account and start interacting!
- Technologies Used: HTML5, CSS, JavaScript, Bootstrap, JWT authentication, APIs, Heroku, Node.js, Express.js, React.js, Redux, MongoAtlas

BeeNeat https://github.com/mgmarti/BeeNeat | https://mgmarti.github.io/project-1/
- The Idea for this project is to help the user to organize, bookkeeping and spend more time on things that matter.

● Technologies Used: JavaScript, Jquery, and Firebase, Bootstrap, Unsplash API, Google Maps API.

Chili Taco https://github.com/Suha19/Chili-Taco | https://salty-scrubland-10289.herokuapp.com/

    ● Is a food-truck app that lets users input the names of tacos they'd like to eat.

    ● Technologies Used: MySQL, Node, Express, Handlebars and a homemade ORM. I used Node and MySQL to query and route data in my app, and Handlebars to generate my HTML.
